PRESS RELEASE

After a thorough and professional evaluation process, the Government of the Cooperative Republic of Guyana has awarded the team of Lindsayca and CH4 Systems one of the most impactful projects in Guyana and the region. We are grateful for the confidence placed in our team and are committed to helping the Guyanese people leverage their natural resources into clean and affordable energy.

This contract will give EEGPL the tools to continue guaranteeing a reliable power supply into the future and will bring about substantial energy savings for the country, reducing electricity costs significantly for families and commercial users alike, helping to foment sustainable economic growth.

Our commitment to the Government of Guyana, through our experience and know how, is to bring the latest and most efficient technology available today. The GtE project includes a Natural Gas Liquids (NGL) extraction plant and a 300 MW power generation facility linked to the national grid.

We are thrilled to be part of a project that will promote growth while providing clean, reliable and stable energy, resulting in additional income for the country and savings for the Guyanese people.

Lindsayca and CH4 Systems, based in Houston, Texas and San Juan, Puerto Rico, have over 130 successfully completed EPC projects, with strong expertise in power generation and oil and gas treatment.
